

CLUB MANAGEMENT SYSTEM

Objectives:

- ❖ Reduce paperwork and manual processes:
Instead of maintaining paper files with member information, everything is stored digitally.

- ❖ Improve Efficiency and Organization.
As everything is managed and stored digitally, improves efficiency and allow for systematic organizing data

- ❖ Centralize data management
It maintains data for every members and events that can be accessed from single, unified location

- ❖ Enhance Communication and Collaboration.
It enhance communication and collaboration within members and admins about events and any update information

- ❖ Provide members with a personal profile.
It provides profiles for each members with their personal details which they have stored.

- ❖ Simplify membership management (e.g., adding, updating, and removing members).

This project, Club Management System is being developed for an organization named “Rotary Club Prime,Dharwd”. Based on the needs and feedback provided by the organization, ensuring that it aligns with their workflow and enhances their management capabilities. The system will be user-friendly, secure, and accessible, catering to both administrator and members.

Duration of month:

➤ 2 months

Members of the project:

Limitation of the project:

- Limited Automation :

May not support automatic event reminders, or seamless Limited calendar integrations.

- Limited Member Engagement Features :

Might lack discussion forums, newsletters, or messaging features.

Scope of the project:

- Attendance Tracking:

Members can confirm attendance and track participation.

- Financial Management :

Generating funds and adding their payment modes and details to the member profiles.
